

Fencing your home

Your fence and your home

Your front garden begins with the path from your fence to the front door. The fence you select forms an extension of your home and lifestyle.

Strength and Reliability

ARC garden fences are designed with strength and robustness to provide you with a long-lasting feature fence for your home.

- Choose from wire-based fencing with 5mm or 8mm diameter vertical wires.
- The 'through-rail' designed tubular fencing range consists of vertical tubes passed through the horizontal rails, instead of simply being face-welded.
- Steel and aluminium ARC fences provide 100% termite protection, unlike timber fencing.
- Corrosion resistance is achieved through galvanised finishes for steel fences as well as our complete range of aluminium fencing.

Environmentally Responsible

- All wire-based garden fencing is manufactured from recycled steel.

Style and Choice

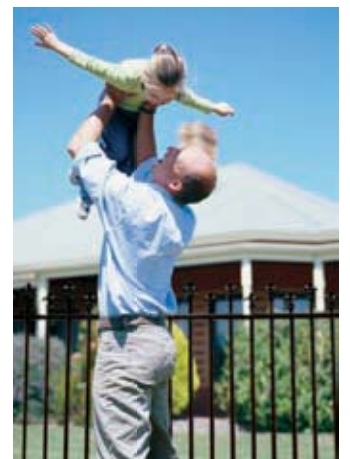

- Choose from the most extensive range of garden fences and gates to suit your taste and budget.
- Options available include: wire, tubular steel, tubular aluminium and steel picket fencing in a variety of colours, styles and finishes.

Warranty

- ARC Fences is proud to provide you with a comprehensive warranty, ensuring that your new fence is the best quality fence available.
- 3 year warranty* for pre-galvanised fencing.
- 5 year warranty* for hot-dipped galvanised fencing.

Dependability

- ARC Fences have been manufactured in Australia for Australians since 1920.
- You can choose with confidence knowing that an ARC fence will add value to your home and give you peace of mind for years to come.
- Testing is conducted in a NATA (National Association of Testing Authorities Australia) accredited laboratory under controlled conditions.
- All wire-based fencing is manufactured to meet Australian Standard AS2423 'Coated Steel wire fencing products for terrestrial, aquatic and general use' for design, construction and performance requirements.

Tubular Fencing

Both a classical and contemporary look can be achieved with ARC Fences tubular fence range. Tubular designs are available in a host of materials, finishes, sizes and colours. Tubular fencing incorporates a **'through-rail' design for maximum strength and robustness.**

The vertical tubes are strengthened by passing them through the top and bottom rails of the fence. This eliminates the need to have the tubes face-welded, where by the welds and tubes are exposed to possible breakage when repeatedly pulled or leaned on.

What's more, there is no front or back of the fence, so you'll be able to enjoy the fence from both sides. Tubular designs are available in a wide variety of materials and sizes, in a galvanised, aluminium or powder-coated finish*.

Steel styles: Lawson™, Sturt™, Blaxland™, Bass™, Lassiter™, Leichardt™, Bourke™, Oxley™, Wills™, Jardine™

Aluminium styles: Portsea™, Hayman™, Keppel™, Noosa™, Eden™, Byron™, Lorne™

Panel size: 2.4m or 3.0m lengths

Height: 900mm, 1200mm, 1500mm and 1800mm

Tube size: 16mm or 19mm diameter vertical tube

Blaxland™ in Black, set between elegant brick piers

Wire-Based Fencing

Wire-based ARC fences are manufactured using recycled steel and meet Australian Standard AS2423.

Wire-based fencing provides distinct and elegant styles for your home and garden. Strength and security are achieved with the use of 5mm or 8mm diameter vertical wires.

To add that extra dimension to your garden fence the Banksia, Jacaranda, Garden, Wattle^{^^} and Acacia styles feature a unique roll top and bottom design.

Styles: Willow^{^^}, Wattle[™], Banksia[™], Jacaranda[™], Garden, Acacia[™]

Choose from a variety of sizes. Styles are available in both a galvanised and powder-coated finish*.

Jacaranda[™] in Black

Garden in Claret

Banksia[™] in Charcoal

Steel Pickets

ARC Fences' range of Steel Picket fencing offers a viable substitute to traditional timber pickets. Unlike timber pickets, the Steel Picket fencing systems are powder-coated so there is no need to spend further time and effort painting bare pickets.

Style: Steel Picket

Length: 2.4m

Height: 600mm, 900mm,
1200mm, 1500mm and 1800mm

Quality Assurance

When purchasing an ARC fence, look for the authentic ARC Fences sticker. The sticker appears on the underside of the top rail on tubular ARC fences and on the underside of the bottom rail for wire-based ARC fences with top and bottom rails.

Step by Step Guide to choosing an ARC Fence

Alternatively log onto www.fences.com.au

The above styles come in a range of heights and lengths. For the exact sizes available in your state, contact ARC Fences on 1800 FENCES (336 237).

These colours are a sample only. ARC Fences has a full range of decorative colours available. Conditions do apply for non-standard colours.

Fence Maintenance In order to keep your ARC fence looking good for years to come, follow these maintenance steps:

- Weekly brushing or hosing (using a pressure nozzle fitted to your garden hose) to remove any built up dirt, cobwebs or salt deposits.
- Bi-annual wash-down with warm water and a mild detergent. The frequency of the maintenance steps must be increased if your ARC fence is installed within 1500 metres of marine locations.

***ARC Fence Warranty - Terms and Conditions:** In addition to governing statutes, ARC The Australian Reinforcing Company warrants that the STRUCTURE of ARC fences, gates and panel products sold to its customers will be free from manufacturing defects. The warranty is given subject to the following limitations: A. For Product Hot Dipped Galvanised After Manufacture: The warranty is given for a period of 5 years. The warranty does not apply if fencing is used within 1500 metres of a marine location. The warranty applies only if the maintenance procedures outlined in this brochure are adhered to. Proof of purchase will be required prior to admission of any warranty claim. Use of heavy cleaners, such as brick acids, will void the warranty. ARC The Australian Reinforcing Company may repair or replace defective products at its absolute discretion. B. For Product Pre-Galvanised: The warranty is given for a period of 3 years. The warranty does not apply if fencing is used within 1500 metres of a marine location. The warranty applies only if the maintenance procedures outlined in this brochure are adhered to. Proof of purchase will be required prior to admission of any warranty claim. Use of heavy cleaners, such as brick acids, will void the warranty. ARC The Australian Reinforcing Company may repair or replace defective products in its absolute discretion. Powder-coated decorative finishes enhance the appearance of your ARC fence and are not covered by this warranty as their quality depends on numerous factors outside the control of ARC The Australian Reinforcing Company. This warranty only applies to products installed in accordance with the manufacturer's recommendations. In the event of a warranty enquiry, contact the place of purchase or ARC The Australian Reinforcing Company.

Options may vary from state to state. Please check with your local ARC Fences representative on 1800 FENCES (336 237).
