

### One-Stop Chainwire Shop

Chain Wire fencing (also referred to as wire netting, wire mesh fence, cyclone fence, hurricane fence, or diamond-mesh fence) is a type of woven fence usually made from galvanized or PVC-coated steel wire.

The wires run vertically and are bent into a zig-zag pattern so that each "zig", hooks with the wire immediately on one side, and each "zag" with the wire immediately on the other. This forms the characteristic diamond pattern visible in this type of fence.

If you need a special product, a chain wire product not shown or have a large fencing project - we're here to help, send us an email via [sales@arcfences.com.au](mailto:sales@arcfences.com.au). Or call us to check which products are available on (07) 3382 8201 or (07) 3382 8203.

Chain Wire fences use the woven steel wire to make the panel, which results in its renowned versatility for a range of applications.

Due to these different applications, it is available in various wire gauges and mesh sizes to suit a range of project requirements.

### What we offer?

- A consistent service-based offer
- A business that is easy & flexible to deal with
- Trust-based relationships with a focus on positive commercial & environmental outcomes
- Consistent quality - we get it right the first time
- We understand your business & are here when you need us
